

Orphan Annie, a young purebred Golden Retriever, was found in a snowbank near Glenwood, MN, where she had been shot twice and left to die.

But thanks to excellent veterinary care from the University of Minnesota—and the many generous supporters who contributed to Retrieve a Golden of Minnesota (RAGOM)—Annie is feeling much better now! She is well on the way to a full recovery.

Annie would like to meet everyone who helped save her life through their thoughts, prayers and donations. Please come join Orphan Annie in a celebration of life and gratitude, so she can have the opportunity to thank you in person with tail wags and slobbery kisses!
